

ALIGNERS

Simpli5

Red, White & Blue

Simpli5 is an express aligner system that provides a fast, effective and simple solution to minor and intermediate anterior misalignments. The patient wears five appliances per arch that are programmed with incremental correction to move the teeth to their desired end result. There's one simple-and-attractive fee per arch (upper and lower), which allows you to quote the right treatment cost to your patients.

Every Simpli5 treatment can be supplemented with two "refinement" aligners if needed to fine-tune the final results. In this instance, you'll just forward the original set-up models and new impressions to our customer service department. AOA's technical support staff will then contact you to plan the refinement.*

The **Red, White and Blue** aligner system offers a solution to those adult dentition patients who are just outside the normal range of other removable tooth aligning appliances, such as Hawley or spring type retainers. RWB is ideal for patients who want the simplest aesthetic system possible to correct minor to intermediate incisal tooth malalignments. In addition to being aesthetically pleasing, RWB will not affect the patient's speech and is very cost effective.

AOA will reposition the incisors ideally or as ideal as the malalignment will allow.

* Extra charge for refinement appliances.
