

Prezurv™

Whether you are about to complete treatment, have been out for several years or never had braces, teeth are prone to shift and move as we age. Prevent relapse and maintain your healthy smile by using **Prezurv™** retainers.

Features and Benefits

- Clear retainers shipped to your office to hold your patient's ideal position.
- Available in scalloped or straight trim.
- Bonded lingual wires or pontics can be added if needed. Pontics are available in the most popular tooth shades.
- One week* turnaround time.
- Retainers come with models, storage container and box to store additional retainers.
- Available in single tray or dual arch options.
- Choose from .030 material or .040 material using TruGEN XR™ technology in Prezurv Plus.

* Appliances with additions like Memotain®, set-ups, pontics, scans or impressions that are distorted may take longer.

Clear retainers in single tray or dual arch options

Made of durable material for long periods of wear¹

Preserves current tooth position²

Proper wear increases long term smile protection²

AOA continues to enhance its Prezurv™ product line of disposable retainers with our .040 TruGEN XR™ material option. We have partnered with Spark™ Aligners to offer their TruGEN™ material in a retention option which is more rigid, thicker, and sustains retention**.
